Establishing the Department of Interior Science Advisors' Council

1 message

Bernhardt, David <(b) (6) gov>

Mon, Apr 15, 2019 at 8:28 AM

To: Brian Steed <bsteed@blm.gov>, "Cruickshank, Walter" <walter.cruickshank@boem.gov>, Brenda Burman <bburman@usbr.gov>, Scott Angelle <scott.angelle@bsee.gov>, "Paul (Dan) Smith" <paul_smith@nps.gov>, "Owens, Glenda" <gowens@osmre.gov>, Margaret Everson <margaret_e_everson@fws.gov>, James Reilly <jfreilly@usgs.gov>, "Combs, Susan" <susan_combs@ios.doi.gov>

Cc: Timothy Petty <timothy_petty@ios.doi.gov>, "Sweeney, Tara" <Tara_Sweeney@ios.doi.gov>, Dan Jorjani <daniel.jorjani@sol.doi.gov>, Joseph Balash <joseph_balash@ios.doi.gov>, "Travnicek, Andrea" <andrea_travnicek@ios.doi.gov>, Douglas Domenech <douglas_domenech@ios.doi.gov>, John Bockmier <john_bockmier@ios.doi.gov>, Todd Willens <todd_willens@ios.doi.gov>

The purpose of this email is to announce the establishment of the Department of the Interior (DOI) Science Advisors' Council and to solicit membership from the relevant Bureaus and Offices in DOI.

Every bureau uses science to help meet its mission, from stewardship of land and water, to responsible development of natural resources, to protecting the citizens of the United States from the effects of natural hazards. I am committed to ensuring that the decisions we make are informed by the best available science and provides the American people with enough information to evaluate the science we use in our decision making. We have taken an important step with the release of Secretarial Order 3369 – Promoting Open Science. I am now strengthening that commitment by forming the DOI Science Advisors' Council (Draft charter attached). The Council will have five primary functions:

- Provide a forum for discussion of science activities that will enhance scientific innovation, planning, coordination, communication, and effective use of science for decisions made by DOI officials.
- Plan, coordinate, and evaluate strategic science priorities to support the DOI mission, as assigned by senior level officials in the Department.
- Facilitate integration, coordination, and leveraging of resources among bureaus in addressing science needs within the Department, as identified and requested by senior level officials.
- Establish and maintain foundational science practices that apply to all bureaus and offices in DOI. Individual bureaus and office may implement practices more rigorous than the foundational practices.
- Serve as the authoritative source regarding implementation of SO 33369 – *Promoting Open Science*

The Assistant Secretary for Water and Science will serve as chair of the Council and the Assistant Secretary for Policy, Management and Budget will provide policy guidance. The Secretary's Science Advisor will be responsible for its day-to-day operations.

The Science Advisors' Council will only be successful if we have the commitment of, and appropriate membership from, your organization. Therefore, I am asking each of you on the "to:" list to identify two members from your organization to serve on the council – a primary member that is knowledgeable of the breadth of the science your organization conducts or uses, and an alternate that is able to step in and fully participate when the primary member is not available. One of their first tasks will be to review and amend or adopt the draft charter that is attached. Please provide the contact information (name and email) for your selectees to Bill Werkheiser, Science Advisor to the Secretary, by April 26, 2019. If you have any questions or would like to learn more about the Council, please contact Bill (William_werkheiser@ios.doi.gov) at 202-208-1430. Thank you for your help in standing up this important council.

David Longly Bernhardt

Fwd: DEADLINE 6PM: Review of DRAFT narrative

4 messages

James Reilly <jfreilly@usgs.gov>

Wed, Jan 23, 2019 at 11:29 PM

To: (b) (6) gov

Sir,

I had no warning this was coming as far as I can tell. In the 46 minutes I had to respond to this I was driving myself back to Reston to join my family for dinner. I would have had more to add if a heads up had been given with sufficient time to coordinate a response.

Jim,

You are in good shape.

Ryan Nichols meet with Heather and Eli Wednesday afternoon. Ryan used our first 15 day plan as the template....

Ryan would like to update any possible travel in February you might "wish to take if we come back from lapse in approps.

You are covered for this request.

Tim,

Hi all,

Attached, please find a draft narrative from Russ Newell on Interior operations during the lapse in appropriations. We are requesting that you review the attached and respond to John, Russ, and I by **6PM tonight**. Sorry for the short turnaround request. This is a Chief of Staff priority.

From your responses, I will compile the final and ensure it gets to Todd.

In your review, please verify and confirm the information contained within the document as it relates to your hallway. Please also add where you see something missing.

Re: updated draft narrative

3 messages

MacGregor, Katharine <katharine_macgregor@ios.doi.gov>

Wed, Jan 23, 2019 at 4:15 PM

To: "Newell, Russell" <russell_newell@ios.doi.gov>

Cc: Todd Willens <todd_willens@ios.doi.gov>, John Bockmier <john_bockmier@ios.doi.gov>, Faith Vander Voort <faith_vandervoort@ios.doi.gov>, "Hammond, Casey" <casey_hammond@ios.doi.gov>, "Cruz, Mark" <mark_cruz@ios.doi.gov>, James Reilly <jfreilly@usgs.gov>

Casey - Please add the # of miners who received healthcare as a result of that payment.

Mark Cruz - Please add the number of school children impacted/attending BIA schools that are open

Russ - Please strike 300 human resources officials from OWF - that number is inaccurate as of yesterday I believe. Also - this draft needs to be cleaned up a bit for consistence so all bureaus activities are snapshots and consistent in formatting.

Also - please work with Jim Reilly - I believe earthquake early warning and shake alerts are continuing. Also I believe that USGS Stream Gauges are in operation (contrary to an article published last week).

-Kate

Hi Jim - compiling this narrative for David of things we're continuing to do during shutdown. Anything to add from USGS?

Kate mentioned:

- I believe earthquake early warning and shake alerts are continuing. Also I believe that USGS Stream Gauges are in operation (contrary to an article published last week).

Can you confirm above and is there anything else I should add?

Functions that have continued at DOI during the partial shutdown:

- Ensured retired miners would receive their retirement benefits through the United Mine Workers Association.
- Initiated the annual hiring process for the firefighters. The **Office of Wildland Fire** is bringing **furloughed human resources officials in to facilitate the hiring of 1,600 temporary-seasonal firefighters.**
- All 183 Bureau of Indian Education schools have remained open and fully operational. There has been no lapse in service.
- Major national parks remain open and are being cleaned and maintained, including the National Mall, Yellowstone, the Grand Canyon, the Statue of Liberty, Bryce Canyon, and Arches and Canyonlands.
- Roads are being plowed.
- 38 national refuges in 19 states have reopened.
- Fire preparedness and suppression continues.
- Inspections and enforcement for oil and gas contracts have continued.
- Inspections and enforcement for logging operations have continued
- Inspections and enforcement for rights-of-way contracts have continued.
- Law enforcement personnel continue to operate at BLM, NPS, BIA, & FWS.
- Emergency response continues.
- OJS sworn officers and corrections officers have remained on the job at Bureau of Indian Affairs, providing law enforcement in Indian communities and manning corrections facilities.
- We are paying U.S. National Park Police.
- Natural disaster monitoring continues uninterrupted at USGS
- We've brought in HR leaders to assist employees through the lapse.
- Wild Horses and Burros are being fed and cared for, and holding facilities are being managed.
- A limited number of special recreation permit authorizations and concession/commercial recreation leases and renewals may be processed.
- BLM is processing a special recreation permit for a mountain bike group tour event on Black Canyon National Recreation Trail (AZ).
- BLM is processing a special recreation permit for a Glendale Union School District (AZ) JROTC Invitation Orienteering Event.
- Campgrounds, boat ramps, and other recreation sites will be open.
- CA Desert Quartzite Solar EIS.
- North Gila-Imperial Valley Substation 500 KV Transmission Line – assessing project needs for ROW.
- Continue working on outstanding ROW grant for Palen Solar project (CA)
- Walker Ridge Wind Project EIS (CA) – assessing project needs.
- Continuing rehabilitation efforts for Bull Draw and Buttermilk Fires.
- BLM employees have continued inspecting oil and gas drilling sites for the protection of sensitive natural resources.
- BLM is processing grazing permits.
- BLM is processing drilling permits.
- BLM is processing renewable energy permits.
- Some FOIA officials are being brought back.
- Ethics legal team is operating.
- The Office of Insular Affairs (OIA) continues to operate the following essential programs with non-lapsing permanent funding:
 - The Compact of Free Association Economic Assistance;
 - Capital Improvement Project on-going construction program grants; and
 - The American Samoa Judiciary.
- OIA has also provided \$300,000 to LBJ Hospital in American Samoa for emergency continuing operations funding due to the lack of new appropriations.

- Bureau of Reclamation (BOR) is working to finalize drought contingency plan in the Colorado Basin States.
- BOR is conducting Biological Assessment for the operations of the Central Valley Project and the State Water Project. Utilizing WIIN Act's new flexibilities to capture as much of the water from this month's storms as we can for 2019.
- Shasta Dam in the pre-construction phase.
- FY-2019 Water and Energy Efficiency Program - Water and energy efficiency grants focus on projects that conserve and use water more efficiently.
- WaterSMART's Small-Scale Water Efficiency Projects - Through this program, Reclamation provides 50/50 cost-share funding to irrigation and water districts, tribes, states and other entities for small water efficiency improvements that have been identified through previous planning efforts.
- BOR is working with Friant Division Contractors to revise the Friant Operational Guidelines. The operational guidelines are written to establish procedures guiding water supply management of the Friant Division, Central Valley Project in California.

BLM Overview:

- The BLM is continuing to bring back employees to prepare for the March (first quarter) and June (second quarter) oil and gas sales in the following states: Wyoming, Colorado, Montana/Dakotas, Utah, and New Mexico.
- Employees are also being brought back to assist with the processing of grazing related items through the use of available carryover funds.
- Applications to drill (APDs) are continuing to be processed, as they are fee-based activities.
- Special Recreation Permits (SRPs) are being processed and administered for over 30 events taking place on federal land, such as the King of the Hammers (an off road race) in California.
- The BLM is bringing on employees to focus efforts on both ongoing post-fire treatments and fuels reduction projects to prepare for the 2019 wildfire season.
- Carryover and cost recovery funds are being used to continue work on a variety of projects ranging from solar and mining projects to transmission lines.
- Wild horses and burros continue to be fed and cared for both by BLM staff and through contract work.
- Timber sales are in process to begin in February 2019.
- BLM lands continue to be open to the public.
- Each State Office continues to coordinate trash collection and restroom maintenance where appropriate.

Kate,

I asked Doug Beard to forward what had been put together on the NCA4 report. Not knowing exactly what he is looking for but assuming a background for hearing prep, does it cover what he wants?

I'm assuming he doesn't want to see everyone from USGS that had a hand in it? That's 24 people, it turns out. I would suggest me, Doug, Virginia Burkett, Anne Kinsinger and maybe one other TBD. Also would add Tim Petty.

Yep I think that works and I'm sure a smaller group would be better.

Jim/Walter - Is it possible to quickly get a USGS overlay map of the component basins in the Permian to put the Delaware/Wolfcamp in context? This is what i'm working off of from your assessment late last year - can you put the Midland basin in there?

Kate, we've pinged our assessment folks in Denver; they're the ones who have the layers and who could quickly turn this around. We've gotten this on their radar to they can take action when they get into the office in Denver/U.S. Mountain time. I'm tied up today but I'll keep on this to make sure we get something to you as soon as we can. Thanks...

Walter

Subject: [EXTERNAL] Meeting announcement: Board on Earth Sciences and Resources meeting on Geohazards and Cascading Effects, June 24

To: Eide, Elizabeth <EEide@nas.edu>, DeVane, Courtney <CDeVane@nas.edu>

Dear colleagues,

The Board on Earth Sciences and Resources would like to invite you to their June 24 meeting in Washington, DC on the topic of **"Geohazards and cascading effects: Opportunities for leveraging instruments, monitoring approaches, and science capabilities."** The meeting will be held at the **Keck Center, 500 Fifth Street, NW, in room 101, from 0930am until 3:45pm.**

The meeting will feature speakers, panelists, and discussion about monitoring tools, data, modeling, and analysis for early warning systems; opportunities for leveraging instruments and capabilities among different science communities; the timescales and effectiveness of the instruments and models, and areas for improvement; the opportunities for machine learning, artificial intelligence; and the needs for real-time data and data management.

The attached agenda contains more information.

Please register to attend the meeting in person or virtually using this link. We hope to see you there!

If you have questions, do feel free to reach out to Courtney DeVane (cdevane@nas.edu) or me (eeide@nas.edu).

Best wishes,
Elizabeth

Elizabeth A. Eide, Ph.D.

<Public Agenda-BESR-June 24.pdf>

GEOHAZARDS AND CASCADING EFFECTS

Opportunities for leveraging instruments, monitoring approaches,
and science capabilities among different science communities

Many geohazards are treated independently, including the monitoring and infrastructure considerations for each hazard. However, geohazards may be related in time and space—for example, earthquakes, volcanoes, and landslides, or wildfires, massive rainfall events, and debris flows. Multi-hazard environments offer opportunities to leverage monitoring instrumentation and applications, as well as evidence-based practices to inform understanding of geohazard processes and the development of early warning systems. Because the spatial locations and timeframes, the appropriate sampling frequency, resolution, and scale—which can range from local to global—of monitoring may vary by hazard, data and instrument needs for different, linked geohazards may vary even if some instruments and approaches overlap. Through discussion and some case examples, this meeting will address several overarching themes

- What are the monitoring tools, data, modeling, and analysis that go into early warning systems for different types of geohazard events?
- What opportunities exist for leveraging instruments and capabilities among different science communities and the geohazards they study?
- How effective and over what time scales can these instruments and models be applied? Where can they improve?
- Are real-time data needed, or not? Can machine learning and artificial intelligence be used as proxies for lack of data or models?

The complexities of geohazards, and particularly linked geohazards—are not new but the opportunity to leverage instruments, monitoring approaches, and science capabilities may allow communities and decision makers to develop more predictive and less reactive measures to address the risks geohazards pose.

GEOHAZARDS AND CASCADING EFFECTS

Opportunities for leveraging instruments, monitoring approaches,
and science capabilities among different science communities
